

Wood Energy Ltd

Supply, Installation and Service of Wood Fuelled Heating Systems

The well-established, Italian wood pellet stoves from Extraflame range between **5 and 22kW** and offer clean efficient heat automatically. Environmentally friendly and beautiful to look at, these low maintenance units will enhance the décor of any room. Noise emissions were a prime consideration during the design of these stoves, which are probably the **quietest available**. The devices with a backboiler also function as a **central heating system**.

The installation is carried out by trained installation companies all over the UK.

Extraflame

Most of the devices are **eligible for a grant under Clear Skies**, which reduces the costs considerably (please see pellet stoves and wood-fuelled boilers on the Clear Skies website <http://www.clear-skies.org/manufacturers/RecognisedProducts.aspx>).

Wood Energy Ltd

Supply, Installation and Service of Wood Fuelled Heating Systems

The Binder "Firefox" PK-series has a reputation for high efficiency with minimal emissions. Total reliability and user friendly operations make this the perfect boiler choice for residential areas and public buildings. The **boiler systems** range **between 10 and 45 kW**.

Additional **pellet hoppers** can be connected to the side of the boilers, also available are **remote controls and pneumatic extraction units**. The Firefox boilers from Binder are exclusively available from Wood Energy Ltd.

"**Bio-Energy Capital Grant**" assistance from Wood Energy Ltd is applicable for the Firefox boilers.
