

Compact & power-packed

RB 30 - 60 S PRESTIGE briquetting presses

Reinbold briquetting presses: economical - sturdy - powerful

The RB PRESTIGE series is not only compact in size, it is also power packed. Ideal for use in small and medium-sized plants where particular attention is paid to a maximum cost-benefit ratio.

Other features include:
Sturdy construction, reliability, easy to use, easy maintenance, lower operating costs. Various design versions, wide variety of possibilities for use.

RB 30 - 60 S PRESTIGE briquetting presses

Two different types of pressing chamber loading possibilities are available:

Reinbold briquetting presses are suitable for virtually all types of material that can be formed into briquettes such as paper, plastics, aluminium shavings, clay, textile fibres... Let us advise you!

1. Worm screw... (S-Series)

Compact arrangement of the briquetting unit underneath the funnel

Not too large and not too small: Drive motors and gearbox

2. Slide filler...

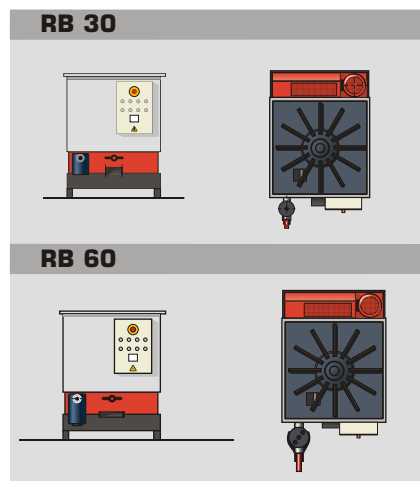

The compact and easy to maintain hydraulic unit

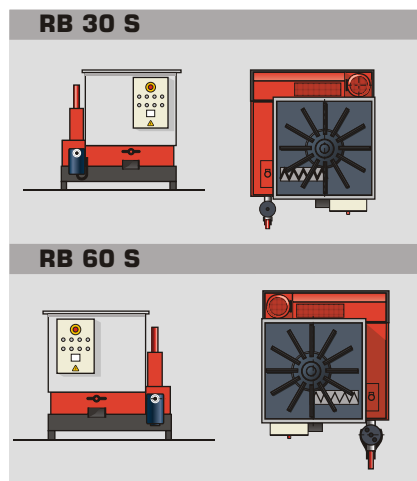

Well-conceived hydraulic system control guarantees economical operation

The RB 30 - 60 S PRESTIGE is exactly right for small quantities: compact, space-saving and compresses your materials reliably into briquettes. Reinbold can also supply the RB 80-160 series for larger volumes.

Please refer to our data sheet for technical data.

Other designs (e.g. special funnel versions) available on request.
